# WILDE TRACKS NEWSLETTER

## MEET WILDE TRACKS TEAM

Greta Barbera , Director of Ecotourism

Greta Barbera, Director of Ecotourism

Greta is an Italian National with a passion for nature and animals. She is a dedicated human rights advocate focused on empowering women and children in Africa. Her work spans promoting social change, education, and advocacy, alongside a passion for wildlife conservation and sustainable ecotourism. With a background in international relations and human rights, she now leads Wilde Tracks ecotourism pillar by integrating multidisciplinary insights to foster both community benefit and ecological integrity.

## Call to action: 3 animals need your help!

## ELEPHANT AND RHINO

*Conservation Mission*

 Durban, South Africa

 28th April - 4th May 2025

2200 USD

Includes:

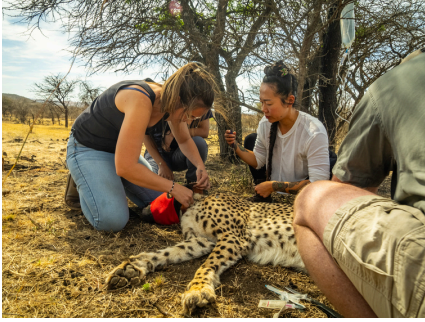

- 7 days accommodation
- Transfers
- All meals and drinks
- Elephant collaring and Rhino dehorning
- Anti-poaching K-9 unit
- Community Visit

## **From the field**

### **Why do we collar predators?**

Predator collaring in Africa is a critical wildlife management practice involving the fitting of radio collars on key species such as lions, leopards, and hyenas. This process enables researchers and wildlife managers to track these predators' movements, monitor their behavior, and gather essential data for understanding population dynamics, habitat use, and interactions with other species. By studying these patterns, conservation efforts can be effectively targeted, ensuring sustainable predator populations and maintaining ecosystem balance.

# MILESTONES ACHIEVED

## OUR IMPACT

- 3 lionesses
- 2 lions

- 1 cheetah

- 1 elephant

- 18 white rhinos
- 4 black rhinos

- 8 cape buffalos

- 1 crocodile

May 2023

**38 animals**

February 2025
